

# Recreation Program Modification Initiative Tonto National Forest

## Navigational Aids Program

Tonto National Forest's Waterway Navigational Aids programs provide buoys & day marks to assist recreational boaters on seven lakes. Doing so provides a more enjoyable boating experience.

Annually the cost to maintain and sustain this program is  
**\$300,000 to \$375,000**

Annually 20% of the markers must be replaced due to wear and tear.

Additional replacements & repairs are made on a weekly basis to maintain the navigational aid system.
